Title: Call Notes for August

Body:

These are the call notes for the Ozone Implementation Workgroup call held on August 16, 2017:

1. Update on 2015 Ozone NAAQS Implementation Rule and Update on 2015 Ozone Designations – Bob Lingard – A Joint ADD and APM call will be held to discuss the next steps in the designation and implementation process. Results of the call will be shared on the next committee call.
2. Follow up from APM call on 2008 ozone Moderate areas, regional plans for moderate areas and the NOI for these areas was discussed by Butch Stackhouse. A special purpose APM call was held on August 2, 2017. Results of the that call were summarized by Megan Brachtel in an email survey to the Regional APMs with list of options on how to proceed on Moderate Area reclassifications and SIP submittals. In addition, EPA received a NOI from an environmental group asking about the SIPS that were due in January 2017, but not yet in.
3. Status of Regions in meeting agreed upon final action dates in Consent decree for failure to act on 2008 ozone SIP submittals. Region 3 said they are working to take action on the RACT SIP for Pennsylvania OTR requirements. Region 9 is addressing the comments in their proposals to finalize by the agreed upon extended deadline.
4. Remaining 2008 ozone Marginal areas. Butch Stackhouse stated that a few of these areas that had previously attained by their attainment date are now not meeting the 2008 NAAQS based on final 2016 ozone data published this month.
5. Butch clarified for the WG that 4th high results presented in the summary table for the Ozone Watch are not for the entire nonattainment area. Ben Wells ozone watch table "4th high", is only the fourth high for the controlling monitor not the entire area. The 4th high for the entire area is available in the new Ozone Watch app under the mapping utility. Butch can provide the steps for using the mapping app if requested.
6. Both Anne Arnold of Region I and Bob Kelly of Region II will be retiring before our next call. We commend them for their long service to our Country, EPA and the environment, and wish them all the best.

7. No new issues for the SIP issues data base.
